Results for announcement to the market

Financial results	2018 US\$m	2017 US\$m	Change US\$m	Change %
Revenue from ordinary activities	772.5	724.4	48.1	Up 6.6%
Profit from ordinary activities after tax attributable to members	121.7	171.8	(50.1)	Down 29.2%
Net profit for the period attributable to members	121.7	171.8	(50.1)	Down 29.2%

Net tangible assets	2018 US\$	2017 US\$
Net tangible assets per security	2.53	2.42

Dividends

On 19 February 2019, the Company's Board of Directors declared an ordinary semi-annual dividend of US\$0.01 per common share (approximately US\$6.2 million), payable on 26 April 2019 to shareholders of record on 7 March 2019. This dividend is unfranked and there is no amount of Conduit Foreign Income per security for this dividend payment for Australian income tax purposes.

Explanation of Results

Revenue for the year ended 31 December 2018 increased by 6.6% mainly due to higher gold ounces sold, higher average prices received for gold and copper and the inclusion of first full year revenue of the Haile Gold Mine which commenced commercial production on 1 October 2017. This is partly offset by lower copper tons sold.

Net profit after tax for the year ended 31 December 2018 was \$121.7 million compared to \$171.8 million for the year ended 31 December 2017, a decrease of 29.2%. This result was attributable to higher operating costs, higher general and administration – indirect taxes and higher income tax expense mainly related to New Zealand and the United States. Prior year income tax credit included the initial recognition of deferred tax assets of \$17.7 million in relation to Haile Gold Mine. This is partly offset by higher revenue, an unrealised gain on the fair value of undesignated gold and copper hedges in 2018 compared to an unrealised loss in 2017. Also, there was no impairment charge in 2018 compared to a one-off impairment charge recognised for mining assets in El Salvador in 2017. The 2018 results include the first full year of the Haile Gold Mine's results.

For further explanation of the results, please refer to the Management Discussion and Analysis of Financial Condition and Results of Operations for the year ended 31 December 2018 together with the Consolidated Financial Statements for the year ended 31 December 2018.

Auditor's Independence Declaration

As lead auditor for the audit of OceanaGold Corporation for the year ended 31 December 2018, I declare that to the best of my knowledge and belief, there have been:

- (a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of OceanaGold Corporation and the entities it controlled during the period.

FINANCIAL REPORT
DECEMBER 31, 2018

C O N T E N T S

	Page
Management's Responsibility for the Financial Statements	2
Auditor's Report	3
Consolidated Statement of Financial Position	6
Consolidated Statement of Comprehensive Income	7
Consolidated Statement of Changes in Equity	8
Consolidated Statement of Cash Flows	9
Notes to the Consolidated Financial Statements	10

The financial statements were authorised for issue by the directors on February 19, 2019. The directors have the power to amend and reissue the financial statements.

Management's Responsibility for the Financial Statements

The accompanying consolidated financial statements of OceanaGold Corporation were prepared by management in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") which are incorporated in the Handbook of the Canadian Institute of Chartered Accountants ("CICA Handbook"). Management acknowledges responsibility for the preparation and presentation of the consolidated financial statements, including responsibility for significant accounting judgements and estimates and the choice of accounting principles and methods that are appropriate to the circumstances of OceanaGold Corporation and the entities it controls ("the Group"). The significant accounting policies of the Group are summarised in Note 2 to the consolidated financial statements.

Management has established systems of internal control over the financial reporting process, which are designed to provide reasonable assurance that relevant and reliable financial information is produced.

The Board of Directors is responsible for reviewing and approving the consolidated financial statements and for ensuring that management fulfils its financial reporting responsibilities. An Audit and Financial Risk Management Committee assists the Board of Directors in fulfilling this responsibility. The members of the Audit and Financial Risk Management Committee are not officers of the Group. The Audit and Financial Risk Management Committee meets with management to review the internal controls over the financial reporting process, the consolidated financial statements and the auditor's report. The Audit and Financial Risk Management Committee reports its findings to the Board of Directors for its consideration in approving the consolidated financial statements for issuance to the shareholders.

Management recognises its responsibility for conducting the Group's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

Independent auditor's report

To the Shareholders of OceanaGold Corporation

Our opinion

In our opinion, the accompanying consolidated financial statements give a true and fair view of the financial position of OceanaGold Corporation and its subsidiaries (together, the Company) as at December 31, 2018 and 2017, and of its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS).

What we have audited

The Company's consolidated financial statements comprise:

- the consolidated statements of financial position as at December 31, 2018 and 2017;
- the consolidated statements of comprehensive income for the years then ended;
- the consolidated statements of changes in equity for the years then ended;
- the consolidated statements of cash flows for the years then ended; and
- the notes to the consolidated financial statements, which include a summary of significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Other information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

PricewaterhouseCoopers, ABN 52 780 433 757

2 Riverside Quay, SOUTHBANK VIC 3006, GPO Box 1331, MELBOURNE VIC 3001

T: 61 3 8603 1000, F: 61 3 8603 1999, www.pwc.com.au

Liability limited by a scheme approved under Professional Standards Legislation.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is John O'Donoghue.

Non-Cash Investing and Financing Activities - refer Note 30

The accompanying notes to the Consolidated Financial Statements are an integral part of these financial statements.

1 BASIS OF PREPARATION

OceanaGold Corporation ("OceanaGold") ("The Company") is a company domiciled in Canada. It is listed on the Toronto Stock Exchange and the Australian Securities Exchange. The registered address of the Company is c/o Fasken Martineau DuMoulin LLP, 2900-550 Burrard Street, Vancouver, British Columbia V6C 0A3, Canada.

The Company prepares its financial statements in accordance with IFRS as issued by the IASB which are incorporated in the CICA Handbook. The consolidated financial statements of the Company, as at and for the year ended December 31, 2018, comprise of the Company (in its capacity of ultimate parent) and its subsidiaries (together referred to as the "Group"). These financial statements have been prepared under the historic cost convention, as modified by the revaluation of certain financial assets and liabilities (including derivative instruments) measured at fair value.

The Group is engaged in the exploration, development and operation of gold and other mineral mining activities. OceanaGold operates one open cut gold mine and two underground mines in New Zealand. The Group also operates an underground operation at Didipio in the Philippines. The Group's Haile Gold mine in South Carolina, USA, commenced commercial production on October 1, 2017.

The preparation of the financial statements in conforming with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a high degree of judgement or complexity, or areas where assumptions are significant to the consolidated financial statements are disclosed in Note 3.

The financial statements were authorised for issue by the directors on February 19, 2019.

2 SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies used in the preparation of these consolidated financial statements are described below. These policies have been applied consistently to all the years presented, unless otherwise stated. Some policies will be revised in the coming year to adopt new accounting standards as outlined below in "Accounting standards effective for future periods", for which the impact has been noted.

Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Bullion sales

Revenue from sales of gold and silver is recognised when control is transferred to the customer, which means the following:

- The product is in a form suitable for delivery and no further processing is required by, or on behalf of the Group;
- The quantity and quality (grade) of the product can be determined with reasonable accuracy;
- The product has been despatched to the customer and is no longer under the physical control of the Group;
- The selling price is determinable;
- It is probable that the economic benefits associated with the transaction will flow to the Group; and
- The costs incurred or to be incurred in respect of the transaction are determinable.

Concentrate sales

The Group recognises the sale of gold, copper and silver concentrate when control is transferred to the buyer. Revenue is recorded under these contracts using forward market gold, copper and silver prices on the expected date that the final sales prices will be fixed based on an agreed quotational period. Variations between the price recorded and the actual final price set are caused by changes in market prices and result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs. The changes in fair value of this embedded derivative are classified as provisional price adjustments. The provisional price adjustments are presented separately in revenue in the statement of comprehensive income. Changes in the fair value over the quotational period and up until final settlement are calculated by reference to forward market prices.

Pre commercial production sales

Revenue from the sales of bullion or concentrate during the commissioning phase of a new mine (before commencement of commercial production) are treated as pre-production income and are credited to capitalised mine development costs.

Interest income

Interest income is recognised on a time proportional basis using the effective interest rate method.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment

Non current assets are reviewed for impairment if there is an indication that the carrying amount may not be recoverable. Impairment is assessed at the level of cash-generating units ("CGU") which, in accordance with IAS 36 'Impairment of Assets', are identified as the smallest identifiable group of assets that generates cash inflows, which are largely independent of the cash inflows from other assets.

When an impairment review is required, the recoverable amount is assessed by reference to the higher of value in use (being the net present value of expected future cash flows of the relevant CGU in its current condition) and fair value less costs of disposal ("FVLCD"). The best evidence of FVLCD is the value obtained from an active market or binding sale agreement. Where neither exists, FVLCD is based on the best information available to reflect the amount the Group could receive for the CGU in an arm's length transaction. This is often estimated using discounted cash flow techniques.

Where recoverable amount is assessed using FVLCD based on discounted cash flow techniques, the resulting estimates are based on detailed "life of mine" and/or production plans of the CGU. For value in use, recent cost levels are considered, together with expected changes in costs that are compatible with the current condition of the business and which meet the requirements of IAS 36.

The cash flow forecasts for FVLCD purposes are based on management's best estimates of expected future revenues and costs, including the future cash costs of production, capital expenditure, closure, restoration and environmental clean-up. For the purposes of determining FVLCD from a market participant's perspective, the cash flows incorporate management's price and cost assumptions in the short and long term. In the longer term, operating margins are assumed to remain constant where appropriate, as it is considered unlikely that a market participant would prepare detailed forecasts over a longer term period. The cash flow forecasts may include net cash flows expected to be realised from extraction, processing and sale of mineral resources that do not currently qualify for inclusion in proven or probable ore reserves. Such non-reserve material is only included where there is a reasonable degree of confidence in its economic extraction. This expectation is usually based on preliminary drilling and sampling of areas of mineralisation that are contiguous with existing reserves. Typically, the additional evaluation to achieve reserve status for such material has not yet been done because this would involve incurring costs earlier than is required for the efficient planning and operation of the mine.

As noted above, cost levels incorporated in the cash flow forecasts for fair value purposes are based on the current life-of-mine plan or long term production plan for the CGU. Because future cash flows are estimates for the asset in its current condition, value in use does not reflect future cash flows associated with improving or enhancing an asset's performance. Anticipated enhancements to assets may be included in FVLCD calculations.

Where the recoverable amount of a CGU is dependent on the life of its associated orebody, expected future cash flows reflect long term mine plans, which are based on detailed research, analysis and iterative modelling to optimise the level of return from investment, output and sequence of extraction. The mine plan takes account of all relevant characteristics of the orebody, including waste to ore ratios, ore grades, haul distances, chemical and metallurgical properties of the ore impacting on process recoveries and capacities of processing equipment that can be used. The life-of-mine plan is therefore the basis for forecasting production output and production costs in each future year.

The discount rates applied to the future cash flow forecasts represent an estimate of the rate the market would apply having regard to the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted. The Group's weighted average cost of capital is used as a starting point for determining the discount rates, with appropriate adjustments for the risk profile of the countries in which the individual CGUs operate as well as the stage of development of the CGU.

For operations with a functional currency other than the US dollar, the impairment review is undertaken in the relevant functional currency. The great majority of the Group's sales are based on prices denominated in US dollars. To the extent that the currencies of countries in which the Group produces commodities strengthen against the US dollar without commodity price offset, cash flows and, therefore, net present values are reduced.

IAS 36 requires that value in use be based on exchange rates current at the time of the assessment.

Non-current assets other than goodwill that have suffered an impairment are tested for possible reversal of the impairment whenever events or changes in circumstances indicate that the impairment may have reversed.

Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement and the fair value of any pre-existing equity interest in the subsidiary. Acquisition-related costs are expensed as incurred.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Business combinations (continued)

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The excess of any consideration transferred and the amount of any non-controlling interest in the acquiree over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired and the measurement of all amounts has been reviewed, the difference is recognised directly in profit or loss as gain on bargain purchase.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss.

When control of a subsidiary is acquired in stages, its carrying value prior to the acquisition of control is compared with the fair value of the identifiable net assets at that date. If fair value is greater than/less than carrying value, the gain/loss is recorded in the consolidated statement of income.

Consolidation

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Joint arrangements

Under IFRS 11 Joint Arrangement investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations each investor has, rather than the legal structure of the joint arrangement. For joint operation, the Group recognises its direct right to, and its share of, jointly held assets, liabilities, revenues and expenses of joint operations. For joint ventures, the Group accounted for its interests using the equity method, after initially being recognised at cost in the consolidated balance sheet.

Equity method

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits and losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from joint ventures are recognised as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its joint ventures are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees are changed where necessary to ensure consistency with the policies adopted by the Group.

Other financial assets

The Group classifies its financial assets in the following measurement categories:

- Those to be measured subsequently at fair value (either through other comprehensive income (OCI) or through profit or loss), and
- Those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms if the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investment in equity instruments that are not held for trading, the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The Group reclassifies debt instruments when and only when its business model for managing those assets changes.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Other financial assets (continued)

Financial assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- **Amortised costs:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payment of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit and loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.
- **FVOCI:** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amounts are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.
- **Fair value through Profit and loss (FVPL):** Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

The Group subsequently measures all equity investments at fair value. The Group's management has elected to present the fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Group's right to receive payments is established.

Foreign currency translation

These consolidated financial statements are expressed in United States dollars ("US\$") which is the reporting currency for OceanaGold Corporation. The functional currency is Australian dollars ("AUD"). The major controlled entities of OceanaGold have either United States dollars, Australian dollars, New Zealand dollars ("NZD"), Philippines pesos ("PHP"), Canadian dollars ("CAD"), or Euros ("EUR") as their functional currency.

(i) Functional and presentation currency

The financial statements of entities that have a functional currency different from the reporting currency are translated into US\$ as follows: assets and liabilities - at the closing rate at the date of the statement of financial position, and income and expenses - at the average rate of the reporting period (as this is considered a reasonable approximation to actual rates). All resulting changes are recognised in other comprehensive income as cumulative translation adjustments.

When an entity disposes of its entire interest in a foreign operation, or loses control, joint control, or significant influence over a foreign operation, the foreign currency gains or losses accumulated in other comprehensive income related to the foreign operation are recognised in profit or loss. If an entity disposes of part of an interest in a foreign operation which remains a subsidiary, a proportionate amount of foreign currency gains or losses accumulated in other comprehensive income related to the subsidiary are re-allocated between controlling and non-controlling interests.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in currencies other than an operation's functional currency are recognised in the statement of income.

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at bank and on hand and short-term deposits that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Trade and other receivables

Trade and other receivables are initially recorded at the amount of contracted sales proceeds, and then subsequently carried at amortised cost using the effective interest method, less provision for impairment.

Trade receivables related to the concentrate sales are initially recorded at the amount of the provisional sales prices, and then subsequently recorded at fair value each period until final settlement occurs.

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. Loans and other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. If collection of the amount is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

Due to the short term nature of the current receivables, their carrying amount is assumed to be the same as their fair value.

Inventories

Ore, concentrate and bullion

Inventories are valued at the lower of weighted average cost and net realisable value. Costs include mining and production costs as well as attributable commercial, environmental and health and safety expenses. Ore inventory that is not expected to be processed within one year is classified as non-current.

Gold in circuit

Gold in circuit is valued at the lower of weighted average cost and net realisable value. The average cost of production for the month is used and allocated to gold that is in the circuit at period end. These include mining and production costs as well as attributable commercial, environmental and health and safety expenses.

Stores

Inventories of consumable supplies and spare parts are valued at cost less a provision for obsolescence. Cost includes all expenses directly related to the purchase of the stores inventory. Cost is assigned on a weighted average basis.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment. Cost includes expenditure that is directly attributable to the acquisition of the item. In the event that all or part of the purchase consideration is deferred, cost is determined by discounting the amounts payable in the future to their present value as at the date of acquisition.

Subsequent costs are included in the asset's carrying amount, or recognised as a separate asset as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance costs are charged to the profit or loss during the reporting period in which they are incurred.

Property, plant and equipment, except freehold land, are depreciated over their estimated useful lives on a straight line, reducing balance or units of production basis, as considered appropriate, commencing from the time the asset is held ready for use.

Depreciation rates used are as follows:

Buildings	2% - 6.25% per annum
Mining equipment (operating sites)	unit of production based on reserves
Mining equipment (non-operating sites)	10% - 33% per annum
Other plant and equipment	10% - 48% per annum

The asset's residual values, useful lives and amortisation methods are reviewed and adjusted if appropriate, at each financial year end.

An item of property, plant and equipment is derecognised upon disposal or when no further economic benefits are expected from its use.

Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the year the asset is derecognised.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Mining assets

Exploration and evaluation expenditure

Exploration and evaluation expenditure is stated at cost and is accumulated in respect of each identifiable area of interest. Such costs are only carried forward to the extent that they are expected to be recovered through the successful development of the area of interest (or alternatively by its sale), or where activities in the area have not yet reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable resources, and where active work is continuing. Accumulated costs in relation to an abandoned area are expensed in profit or loss in the period in which the decision to abandon the area is made. A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

Mining properties under development

Mining properties under development are accounted for at cost and are not amortised until production has commenced and include major expansion projects at operating mines. Cost includes expenditure that is directly attributable to the development of mining properties and preparing them for production. Mining properties under development also include some tangible assets which will be reclassified to property, plant and equipment upon completion of the construction project. Revenue from the sales of gold, silver and copper during the commissioning phase are treated as pre-production income and are credited to capitalised mine development costs.

Mining properties in production

Mining properties in production (including exploration, evaluation and development expenditure) are accumulated and brought to account at cost less accumulated amortisation in respect of each identifiable area of interest. Amortisation of capitalised costs, including the estimated future capital costs over the life of the area of interest, is provided on the units of production basis, proportional to the depletion of the mineral resource of each area of interest expected to be ultimately economically recoverable.

Provisions

Provisions are recognised when the Group has a present obligation, it is probable that there will be a future sacrifice of economic benefits and a reliable estimate can be made of the amount of the obligation.

When the Group expects some or all of a provision to be recovered from a third party, the receivable is recognised as a separate asset but only when the reimbursement is virtually certain and it can be measured reliably. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the liability (if not built into the estimated cash flows). The increase in the provision due to the passage of time is recognised as an interest expense.

Asset retirement and environmental rehabilitation

Asset retirement and environmental rehabilitation provisions include the dismantling and demolition of infrastructure and the removal of residual materials and remediation of disturbed areas. The provision is recognised in the accounting period when the obligation arising from the related disturbance occurs, whether this occurs during the mine development or during the production phase, based on the net present value of estimated future costs. The costs are estimated on the basis of a closure plan. The cost estimates are calculated annually during the life of the operation to reflect known developments and are subject to formal review at regular intervals.

The amortisation or 'unwinding' of the discount applied in establishing the net present value of provisions is accounted for in the statement of income in each accounting period. The amortisation of the discount is shown as an interest expense.

Other movements in the provisions for closure and restoration costs, including those resulting from new disturbance, updated cost estimates, changes to the lives of operations and revisions to discount rates are capitalised within property, plant and equipment or mining properties and development, to the extent that any such amount does not exceed the recoverable amount of the asset. Any amount in excess of the recoverable amount is recognised as a loss immediately.

If an adjustment results in an addition to the costs of the related asset, consideration will be given to whether an indication of impairment exists and the impairment policy will apply. These costs are then depreciated over the life of the area of interest to which they relate.

Trade and other payables

Trade and other payables are liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Trade and other payables (continued)

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Interest-bearing loans and borrowings

All loans and borrowings are initially recognised at the fair value of the consideration received, net of issue costs associated with the borrowing. After initial recognition, interest-bearing loans and borrowings are subsequently carried at amortised cost using the effective interest method by taking into account any issue costs and any discount or premium on settlement.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non cash assets transferred or liabilities assumed, is recognised in the statement of income as other income or finance costs. Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Employee benefits

Wages, salaries and annual leave

Liabilities for wages and salaries, including non-monetary benefits, and annual leave expected to be settled within 12 months of the reporting date are recognised in Other Payables and Employee Benefits in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled.

Defined contribution pension funds

Contributions to defined contribution funds are recognised as an expense in the statement of income as they become payable.

Share based compensation

The Group provides equity-settled and cash-settled awards to certain employees, directors and other designated persons of the Company.

Equity-settled awards are measured by reference to the fair value of the compensation at the date at which they are granted. The fair value of options or rights over shares issued is determined by using appropriate pricing model as per Note 23. In valuing equity-settled awards, no account is taken of any performance conditions, other than conditions linked to the price of the shares of OceanaGold Corporation ('market conditions').

The cost of equity-settled award is recognised, together with a corresponding increase in equity, over the period between the grant date and the date on which the relevant employees become fully entitled to the award ('vesting date').

The cumulative expense recognised for equity-settled awards at each reporting date until vesting date reflects:

- (a) The extent to which the vesting period has expired, and
- (b) The number of awards that, in the opinion of the directors of the Group, will ultimately vest.

No adjustment is made for the likelihood of market performance conditions being met as the effect of these conditions is included in the determination of fair value at grant date.

Cash-settled awards are measured at fair value initially using the market value of the underlying shares on the first trading day on the TSX of each calendar year and the awards are required to be remeasured to fair value at each reporting date until settlement.

The cost is then recorded over the vesting period of the award. This expense, and any changes in the fair value of the award are recognised in the Statement of Comprehensive Income with a corresponding increase or decrease in liability recorded until settlement.

Leases

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Capital leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Leases (continued)

Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in the Statement of Comprehensive Income.

Capitalised leased assets are depreciated over the shorter of the estimated useful life of the asset or the lease term.

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognised as an expense in the statement of income on a straight-line basis over the lease term. Initial direct costs incurred in negotiating an operating lease are capitalised and amortised over the lease term.

Derivative financial instruments and hedge accounting

The Group, where deemed appropriate, uses derivative financial instruments to manage commodity price and foreign currency exposures.

Derivative financial instruments are initially recognised in the Statement of Financial Position at fair value and subsequently re-measured at their fair values at each reporting date.

The fair value of gold hedging instruments including forwards, put and call options is calculated by discounting the future value of the hedge contract at the appropriate prevailing quoted market rates at reporting date.

For the purposes of hedge accounting, where applicable, hedges are classified as either fair value hedges when they hedge the exposure to changes in the fair value of a recognised asset or liability; or cash flow hedges where they hedge exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a forecasted transaction.

The method of recognising the resulting gain or loss is dependent on the nature of the item being hedged.

At the inception of the transaction where hedge accounting applies, the Group documents the relationship between the hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives designated as hedges to specific forecast gold sales.

Changes in the fair value of derivatives that are designated against future production qualify as cash flow hedges and, if highly effective, the gain or loss on the effective portion is recognised in accumulated other comprehensive income. The ineffective portion is recognised in the profit or loss within other income or other expenses. Amounts deferred in Accumulated Other Comprehensive Income are transferred to the income statement and classified as revenue in the same periods during which the hedged sales affect the profit or loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in Accumulated Other Comprehensive Income at that time would remain in Other Comprehensive Income and is recognised when the committed or forecast production is ultimately recognised in the income statement. However, if the committed or forecast production is no longer expected to occur, the cumulative gain or loss reported in Other Comprehensive Income is immediately transferred to the statement of income.

When the hedged commitment results in the recognition of an asset or a liability, the associated gains or losses, previously recognised in Accumulated Other Comprehensive Income, are included in the initial measurement of the acquisition cost or other carrying amount of the asset or liability. Cash received or paid on the settlement or maturity of gold derivatives are recorded as operating cash flows.

The net gains and losses that relate to contracts not designated for hedge accounting purposes are recognised in the income statement.

Borrowing costs

Borrowing costs are expensed as incurred with the exception of borrowing costs directly associated with the construction, purchase or acquisition of a qualifying asset, which are capitalised as part of the cost of the asset.

Earnings per share

Basic earnings/loss per share is calculated by dividing the profit/loss by the weighted average number of shares outstanding during the period. Diluted earnings/loss per share is calculated by dividing the earnings/loss by the weighted-average number of shares outstanding during the period, assuming that all potentially dilutive securities were exercised. The company's potentially dilutive securities comprise stock options granted to employees and directors.

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income tax

Income tax comprises current and deferred tax. Income tax is recognised in the Statement of Comprehensive Income except to the extent that it relates to items recognised directly in equity, in which case the income tax is also recognised directly in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted, or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

In general, deferred tax is recognised in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the balance sheet date and are expected to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognised to the extent that it is probable that the assets can be recovered.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except, in the case of subsidiaries, where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are presented as non-current.

Tax on income in interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred stripping

In open pit mining operations, it is necessary to remove overburden and other waste materials to access ore from which minerals can be extracted economically. The process of removing overburden and waste materials is referred to as stripping. During the development of a mine (or pit), before production commences, stripping costs are capitalised as part of the investment in construction of the mine (or pit) and are subsequently amortised over the life of the mine (or pit) on a units of production basis.

Production stripping activity is disclosed within Mining Assets in production. In order for production phase stripping costs to qualify for capitalisation as a stripping activity asset, three criteria must be met:

- it must be probable that economic benefit will be realised in a future accounting period as a result of improved access to the ore body created by the stripping activity;
- it must be possible to identify the “component” of the ore body for which access has been improved; and
- it must be possible to reliably measure the costs that relate to the stripping activity.

A “component” is a specific volume of the ore body that is made more accessible by the stripping activity. It will typically be a subset of the larger orebody that is distinguished by a separate useful economic life.

Components of an ore body are determined with reference to life of mine plans and take account of factors such as the geographical separation of mining locations and/or the economic status of mine development decisions. Capitalised stripping costs are initially measured at cost and represent an accumulation of costs directly incurred in performing the stripping activity that improves access to the identified component of the ore body, plus an allocation of directly attributable overhead costs.

Such deferred costs are then charged against the income statement on a systematic units of production basis over the expected useful life of an identified component of the ore body.

Changes to the life of mine plan, identified components of an ore body, stripping ratios, units of production and expected useful life are accounted for prospectively.

Sales taxes

Revenues, expenses and assets are recognised net of the amount of sales tax, unless the sales tax incurred is not recoverable from the relevant taxation authority. In this case, it is recognised as part of the cost of acquisition of the asset or as part of an item of the expense.

Receivables and payables are stated inclusive of the amount of sales tax receivable or payable. The net amount of sales tax recoverable from, or payable to, the relevant taxation authority is included with other receivables or payables in the statement of financial position.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Sales tax (continued)

Cash flows are presented on a gross basis. The sales tax components of cash flows arising from investing and financing activities that are recoverable from, or payable to, the relevant taxation authority are classified as operating cash flows. Commitments and contingencies are disclosed net of the amount of sales tax recoverable from, or payable to, the relevant taxation authority. The net of sales tax payable and receivable is remitted to the appropriate tax body in accordance with legislative requirements.

Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chief Executive Officer who makes strategic decisions.

Contributed equity

Ordinary shares are classified as equity. Mandatorily redeemable preference shares are classified as liabilities.

Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the financial year but not distributed at balance date.

Adoption of new standards, amendments and interpretations

The Group has adopted the following accounting standards for the first time for the annual reporting period commencing January 1, 2018:

IFRS 9 - Financial instruments

The adoption of IFRS 9 did not have any impact on the amounts recognised in prior periods and current period. Its equity investments are strategic investments and continue to be fair value through other comprehensive income (FVOCI), the realised and unrealised fair value gains and losses are permanently recognised in the other comprehensive income. The gold and copper hedges are undesignated cash flow hedges and continue to be fair value through profit and loss. The Group does not have material financial assets for which there is an expected credit loss. It only sells to reputable banks, refiners and commodity traders.

IFRS 15 - Revenue from contracts with customers

Revenue is generated from the sale of gold bullion and gold, copper and silver concentrates. Under IFRS 15, Revenue is recognised when control is transferred to the customer which replaced the notion of transfer of risks and rewards in IAS 18 - Revenue (superseded on January 1, 2018).

The Group applied the new standard IFRS 15 using the Modified Retrospective approach which recognises the cumulative effect of initial application as an adjustment to the opening balance of Retained Earnings at January 1, 2018, without having to adjust comparatives in the current year reporting.

The impact on the consolidated financial statements upon the adoption of IFRS 15 from January 1, 2018 under the Modified Retrospective approach is as follows:

- **Bullion sales** - A gold sale that occurred in December 2017 met the revenue recognition criteria under the then prevailing IAS 18 and was correctly recognised in the prior year. The same sale however would not have met the recognition criteria under IFRS 15. Therefore, upon adoption of IFRS 15, the standard requires an adjustment to the opening Retained Earnings of the current year and a recognition of that sale in the current year which results in the below impacts on the Consolidated Statement of Comprehensive Income for the quarter ended March 31, 2018. The implementation of IFRS 15 has no impact on the other quarters ended in 2018.

Extracts of the Consolidated Statement of Comprehensive Income for the quarter ended March 31, 2018	Under IFRS 15 (as reported) \$m	Under IAS 18 \$m	Impact of adoption increase/(decrease) \$m
Revenue	196.7	191.2	5.5
Cost of sales, excluding depreciation and amortisation	(84.7)	(81.7)	3.0
Depreciation & amortisation	(51.4)	(49.7)	1.7
Operating profit	48.3	47.5	0.8
Profit before income tax	51.7	50.9	0.8
Income tax (expense)	(7.2)	(7.0)	0.2
Net profit	44.5	43.9	0.6

2 SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Adoption of new standards, amendments and interpretations (continued)

- Concentrate sales - recognition of these sales was not impacted by IFRS 15. The adoption only resulted in a separate disclosure of revenue arising from the provisional pricing adjustments (Note 4 Revenue).

Accounting standards effective for future periods

The following accounting policies are effective for future periods.

IFRS 16 - Leases

IFRS 16 was issued in January 2016. It will result in almost all leases being recognised on the balance sheet by lessees, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short-term and low-value leases.

The Group has reviewed all of the Group's leasing arrangements over the last year in light of the new lease accounting rules in IFRS 16. The standard will primarily affect the accounting for the Group's operating leases.

As at the reporting date, the Group has non-cancellable operating lease commitments (undiscounted) of \$9.1m, see Note 28. Of these commitments, approximately \$0.1m relate to short-term leases and \$0.1m to low value leases which will both be recognised on a straight-line basis as expenses in the Statement of Comprehensive Income.

For the remaining lease commitments, the Group expects to recognise right-of-use assets and lease liabilities of approximately \$8.3m on January 1, 2019. Overall net current assets will be \$4.2m lower due to the presentation of a portion of the liability as a current liability. Operating lease expenses will be replaced by interest and depreciation and the timing of expense will change. The Group expects that the adoption of IFRS 16 has no material impact on net profit after tax for 2019.

Operating cash flows will increase and financing cash flows decrease as repayment of the principal portion of the lease liabilities will be classified as cash flows from financing activities. The Group will apply the standard from its mandatory adoption date of January 1, 2019. The Group intends to adopt the standard using the "Modified Retrospective Approach". Under this approach, the Group is not required to restate the comparative amounts for the year prior to first adoption and the cumulative effect of initially applying IFRS 16 will be adjusted to opening retained earnings as of January 1, 2019. Since the Group recognises the right-of-use assets at the amount equal to the lease liabilities, there is no impact on the retained earnings.

IAS 28 - Investments in associates and joint ventures

This standard is amended to address the inconsistency between IFRS 10 and IAS 28. The main consequence of the amendments is that a full gain or loss is recognised when the transaction involves a business combination, and whereas a partial gain is recognised when the transaction involves assets that do not constitute a business.

The amendment was originally effective for years beginning on/after January 1, 2016. However the effective date has been deferred indefinitely by the IASB. The Group will apply the standard accordingly when effective. There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Group.

There are no other IFRSs or IFRIC interpretations that are not yet effective and that would be expected to have a material impact on the Group.

3 CRITICAL ESTIMATES AND JUDGEMENTS

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Mining assets

The future recoverability of mining assets (Note 13) including capitalised exploration and evaluation expenditure is dependent on a number of factors, including whether the Group decides and is permitted to exploit the related tenements itself or, if not, whether it successfully recovers the related mining assets through sale.

Factors that could impact the future recoverability include the level of reserves and resources, future technological changes, which could impact the cost of mining, future legal changes (including changes to environmental restoration obligations), changes to commodity prices and foreign exchange rates, and renewal of contracts, licences and permits.

3 CRITICAL ESTIMATES AND JUDGEMENTS (CONTINUED)

Exploration and evaluation expenditure (Note 11) is capitalised if activities in the area of interest have not yet reached a stage that permits a reasonable assessment of the existence or otherwise of economically recoverable reserves. To the extent that capitalised exploration and evaluation expenditure is determined not to be recoverable in the future, profits and net assets will be reduced in the period in which this determination is made. In prior year, as a result of the announcement on March 29, 2017 by the Government of El Salvador to ban all mining for gold and other metals, Management considered this to be an impairment indicator and concluded the value of the mining assets it held in El Salvador was fully impaired during the quarter ended March 31, 2017 (Note 6).

The Group defers mining costs incurred during the production stage of its operations, which are calculated in accordance with accounting policy Note 2 - Deferred stripping. Changes in an individual mine's design will result in changes to the life of component ratios of production. Changes in other technical or economic parameters that impact reserves will also have an impact on the life of component production and cost profile even if they do not affect the mine design. Changes to deferred mining resulting from change in life of component ratios are accounted for prospectively.

(ii) Impairment of assets

The Group assesses each Cash-Generating Unit (CGU), to determine whether there is any indication of impairment or reversal of impairment. Where an indicator of impairment or reversal exists, a formal estimate of the recoverable amount is made, which is the higher of the fair value less costs to sell and value in use calculated in accordance with accounting policy. These assessments require the use of estimates and assumptions such as discount rates, exchange rates, commodity prices (gold, copper and tungsten), sustaining capital requirements, operating performance (including the magnitude and timing of related cash flows), and future operating development from certain identified exploration targets where there is higher degree of confidence in the economic extraction of minerals.

The recoverable amount of exploration assets is dependent on various factors including technical studies, further exploration, and the eventual grant of mining permits. Should these be unsuccessful, the exploration assets could be impaired. An impairment charge of \$17.7 million was recognised in the first quarter ended March 31, 2017 and there was no associated tax impact. Further details are as per Note 6 below.

On February 2, 2017, the Philippines Department of Environment and Natural Resources ("DENR") held a press conference at which OceanaGold's Didipio operation was named as the subject of a proposed suspension order citing alleged declining agricultural production. On February 14, 2017, the Company received an order from the DENR calling for the suspension of the Didipio operation citing "... petition of the Local Government of Nueva Vizcaya for the cancellation of the FTAA; alleged damages to houses caused by the blasting operation; and the potential adverse impact to the agricultural areas of the Province..." as reasons for the decision. Subsequent to receiving the suspension order, the Company filed an appeal with the Office of the President ("OP"), which has the effect of immediately staying the execution of the DENR suspension order. On March 15, 2017, the Company filed the Appeal Memorandum with the OP substantiating its grounds for appeal. The DENR filed its commentary to the Company's Memorandum on or around May 8, 2017, and the Company subsequently filed a further reply to the DENR commentary. The matter is currently awaiting a decision from the OP. The Didipio operation has continued to operate during the appeal process. Should the appeal fail and operations suspended for a prolonged period, the Didipio operation could face impairment.

(iii) Net realisable value of inventories

The Group reviews the carrying value of its inventories (Note 11) at each reporting date to ensure that the cost does not exceed net realisable value. Estimates of net realisable value include a number of assumptions and estimates, including grade of ore, commodity price forecasts, foreign exchange rates and costs to process inventories to a saleable product.

(iv) Asset retirement obligations

Decommissioning and restoration costs are a normal consequence of mining, and the majority of this expenditure is incurred at the end of a mine's life. In determining an appropriate level of provision, consideration is given to the expected future costs to be incurred, the timing of these expected future costs (largely dependent on the life of the mine).

The ultimate cost of decommissioning and restoration is uncertain and costs can vary in response to many factors including changes to the relevant legal requirements, the emergence of new restoration techniques and experience at other mine sites. The expected timing of expenditure can also change, for example in response to changes in reserves or to production rates.

Changes to any of the estimates could result in significant changes to the level of provisioning required, which would in turn impact future financial results. These estimates are reviewed annually and adjusted where necessary to ensure that the most up to date data is used. The carrying value of the asset retirement obligation liability has been disclosed in Note 16 to the financial statements.

(v) Determination of ore reserves and resources

3 CRITICAL ESTIMATES AND JUDGEMENTS (CONTINUED)

Ore reserves and resources are based on information compiled by a Competent Person as defined in accordance with the Australasian Code of Mineral Resources and Ore Reserves (the JORC code) and in accordance with National Instrument 43-101-Standards of Disclosure for Mineral Projects ("NI-43-101") under the guidelines set out by the Canadian Institute of Mining, Metallurgy and Petroleum. There are numerous uncertainties inherent in estimating ore reserves and assumptions that are valid at the time of estimation may change significantly when new information becomes available. Changes in forecast prices of commodities, exchange rates, production costs or recovery rates may change the economic status of reserves and may, ultimately, result in the reserves being restated. Such changes in reserves could impact on depreciation and amortisation rates, asset carrying values and provisions for rehabilitation.

(vi) Taxation

The Group's accounting policy for taxation requires management's judgment in relation to the application of income tax legislation. There may be some transactions and calculations undertaken during the ordinary course of business where the ultimate tax determination is uncertain. The Group recognises liabilities for tax, and if appropriate, taxation investigation or audit issues, based on whether tax will be due and payable, and if there is no more recourse to an appeal process. Liabilities are not recognised until they are determined with reasonable certainty. Where the taxation outcome of such matters is different from the amount initially recorded, such difference will impact the current and deferred tax positions in the period in which the assessment is made.

In addition, certain deferred tax assets for deductible temporary differences and carried forward taxation losses have been recognised. In recognising these deferred tax assets, assumptions have been made regarding the Group's ability to generate future taxable profits from current operations after reaching commercial production and successful development of certain identified exploration targets where there are higher degrees of confidence in the economic extraction of minerals.

Utilisation of the tax losses also depends on the ability of the entity to satisfy certain tests such as substantial change of control tests at the time the losses are recouped. If the entities fail to satisfy the tests, the carried forward losses that are currently recognised as deferred tax assets would have to be written off to income tax expense. There is an inherent risk and uncertainty in applying this judgement and a possibility that changes in legislation or corporate merger and acquisition activity will impact upon the carrying amount of deferred tax assets and deferred tax liabilities recognised on the statement of financial position. Deferred taxes are disclosed within Note 7 to the financial statements.

Moreover, in certain jurisdictions, tax losses may be restricted and only available to offset future profits generated from the same mining permit area. In this case, the recovery of the losses depends on the successful exploitation of the relevant project. Restricted losses could be forfeited if the project did not proceed. Disclosure of taxation is included in Note 7.

Certain input tax credits in overseas subsidiaries have been recognised as a non-current receivable (Note 9). The input tax credits are initially measured at cost, based on the interpretation of the terms and conditions of the relevant tax and investment law which allow for the recoverability of input taxes paid.

In assessing the classification and recoverability of these input tax credits, the Group makes a number of assumptions which are subject to risk and uncertainty including the timing and likelihood of success in working through the required legal process in the relevant jurisdiction. The Group views these input tax credits as recoverable via a tax refund or an income tax credit. Should management determine that, all or some of the input tax will not be recoverable via tax refund or credit in the future, the Group would reclassify eligible amounts to other components of non-current assets as allowable under the relevant accounting standard. Non-eligible amounts, where so determined, may have to be expensed.

Excise tax payments have been made in certain overseas tax jurisdictions despite the Company's view that it should be exempt. These amounts are expected to be recovered in due course, and have therefore been recorded as a non-current receivable (Note 9). Should the amounts ultimately not be recovered, they would be expensed.

(vii) Non-Controlling Interest

A third party has a contractual right to an 8% interest in the operating vehicle that is formed to undertake the management, development, mining and processing of ore, and marketing of products as part of the Didipio mine in the Philippines. This 8% interest in the common share capital of the operating vehicle has similar voting and dividend rights to the remaining majority, subject to the operating vehicle having fully recovered its pre-operating costs. A subsidiary of the Company is currently involved in arbitration proceedings with the third party over certain payment claims.

At the same time, the third party is also involved in a legal dispute with another party over the ownership of the 8% interest. At December 31, 2018 no equity has been issued to any third party due to the various uncertainties. Consequently, no non-controlling interest has been recognised. A non-controlling interest is intended to be recognised after the issue of shares. This requirement has not yet been satisfied due to, amongst other matters, a court restriction resulting from the litigation challenging the claim of this third party from a party not related to the Group.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

4 REVENUE

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Gold sales		
Bullion	590.4	475.4
Concentrate sales	90.0	150.0
Provisional price adjustment	0.4	(0.8)
	<u>680.8</u>	<u>624.6</u>
Copper sales		
Concentrate sales	100.0	112.0
Provisional price adjustment	(2.4)	(1.3)
	<u>97.6</u>	<u>110.7</u>
Silver sales		
Concentrate sales	7.7	8.3
Provisional price adjustment	(0.2)	-
	<u>7.5</u>	<u>8.3</u>
Less concentrate treatment, refining and selling costs	<u>(13.4)</u>	<u>(19.2)</u>
Total Revenue	<u><u>772.5</u></u>	<u><u>724.4</u></u>

There were no gold options hedges (Note 17) exercised for the year ended December 31, 2018 (2017: \$0.8 million loss). The realised gain or loss on gold options is included within Revenue - Gold sales.

Realised gain on copper swap (Note 10) exercised for the year ended December 31, 2018 amounted to \$6.3 million (2017: \$nil). The realised gain or loss on copper swap is included within Revenue - Copper sales.

Provisionally Priced Sales

The Group has provisionally priced gold and copper concentrate sales from Didipio for which price finalisation subject to quotational periods is outstanding at the reporting date. At December 31, 2018, the provisionally priced gold and copper concentrate sales subject to final settlement included a provisional pricing loss of \$0.6 million (2017: \$0.1 million gain).

At December 31, 2018, the provisionally priced gold and copper sales for 10,208 dry metric tonnes of concentrate containing provisional estimates of 14,772 ounces of gold and 2,408 tonnes of copper, subject to final settlement, were recorded at average prices of \$1,270/oz and \$5,978/t, respectively.

5 COST OF SALES BY NATURE OF EXPENSES

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Materials and consumables costs	216.2	158.5
Employee benefits expenses	116.3	78.6
Other direct costs	23.0	38.3
	<u>355.5</u>	<u>275.4</u>

6 IMPAIRMENT OF ASSETS

Non-current assets are tested for impairment when events or changes in circumstances suggest that the carrying amount may not be fully recoverable. As a result of the announcement on March 29, 2017 by the Government of El Salvador to ban all mining for gold and other metals, the Group considered this to be an impairment indicator and concluded the value of the exploration assets it held in El Salvador was impaired. An impairment charge of \$17.7 million was recognised during the year ended December 31, 2017 and there was no associated tax impact.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

7 INCOME TAX

Major components of income tax expense / (benefit):

Statement of operations

Current income tax

Income tax expense relating to tax losses utilised

Income tax expense relating to profit from continuing operations

Deferred income tax

Origination and reversal of temporary differences

Adjustments in respect of deferred income tax of previous years

Income tax expense/(benefit) reported in the statement of comprehensive income

<i>December 31</i>	<i>December 31</i>
<i>2018</i>	<i>2017</i>
<i>\$m</i>	<i>\$m</i>
1.3	2.6
21.5	26.6
11.9	(31.0)
(0.6)	(1.2)
34.1	(3.0)

Numerical reconciliation between aggregate tax expense recognised in the statement of operations and the tax expense calculated per the statutory income tax rate

A reconciliation of income tax expense applicable to accounting profit before income tax at the statutory income tax rate to income tax expense at the Group's effective income tax rate for the years ended December 31 is as follows:

Accounting earnings before tax from continuing operations

At the statutory income tax rate of 25% (2017: 25%)

Adjustments in respect of income tax of previous years

Expenditure/income not allowable/(assessable) for income tax purposes

Build in/(utilisation of) tax losses not recognised

Net deferred tax assets - initial recognition

Effect of differing tax rates between Canada, United States, Australia, New Zealand and

Philippines

Income tax expense/(benefit) reported in the statement of comprehensive income

155.8	168.8
39.0	42.2
(0.6)	(1.2)
4.0	1.7
(1.5)	2.5
-	(17.7)
(6.8)	(30.5)
34.1	(3.0)

The statutory income tax rates in Australia, New Zealand and United States are between 24.95% and 30% (2017: 26.5% and 38.25%). In Philippines, the operating subsidiary is currently subject to an Income Tax Holiday period.

Deferred income tax

Deferred income tax at December 31 relates to the following:

Deferred tax assets

Losses available for offset against future taxable income

Provisions

Accrued expenses

Mineral property

Gross deferred tax assets

Set-off of deferred tax liabilities

Net non-current deferred tax assets

Deferred tax liabilities

Property, plant and equipment

Mining assets

Inventories

Gross deferred tax liabilities

Set-off of deferred tax assets

Net non-current deferred tax liabilities

<i>December 31</i>	<i>December 31</i>
<i>2018</i>	<i>2017</i>
<i>\$m</i>	<i>\$m</i>
78.8	23.6
19.2	20.5
4.9	4.4
12.0	20.1
114.9	68.6
(87.9)	(10.8)
27.0	57.8
(83.2)	(26.9)
(10.2)	(6.9)
(0.6)	(0.7)
(94.0)	(34.5)
87.9	10.8
(6.1)	(23.7)

The income tax paid for the year ended December 31, 2018 is \$0.7 million (for the year ended December 31, 2017: \$7.1 million).

Due to uncertainty in utilisation of tax losses in the foreseeable future, a deferred tax asset has not been recognised in respect of tax losses in the Group amounting to \$77.5 million (2017: \$83.5 million). The ability to use tax losses is subject to generating taxable income in future periods and complying with the tax legislation requirements prevailing at the time of utilisation. During the year, tax losses of \$3.7 million (2017: \$0.9 million) were utilised which were not previously recognised as a deferred tax asset.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

8 EARNINGS PER SHARE

Basic earnings per share amounts are calculated by dividing net income for the year attributable to common equity holders of the parent by the weighted average number of common shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net income attributable to common shareholders by the weighted average number of common shares outstanding during the year (adjusted for the effects of dilutive options where the conversion of potential common shares would decrease earnings per share).

The following reflects the income and share data used in the total operations basic and diluted earnings per share computations:

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
<i>Numerator:</i>		
Net income attributable to equity holders from continuing operations (used in calculation of basic and diluted earnings per share)	121.7	171.8
	<i>Thousands</i>	<i>Thousands</i>
<i>Denominator:</i>		
Weighted average number of common shares (used in calculation of basic earnings per share)	617.6	614.2
Effect of dilution:		
Share options	11.2	11.4
Adjusted weighted average number of common shares (used in calculation of diluted earnings per share)	628.8	625.6
Net earnings/(loss) per share:		
- Basic	\$0.20	\$0.28
- Diluted	\$0.19	\$0.27

9 TRADE AND OTHER RECEIVABLES

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Current		
Trade receivables	12.0	30.8
Other receivables	9.0	11.5
	21.0	42.3
Non-Current		
Other receivables	90.7	81.7
	90.7	81.7

Other receivables mainly consist of \$48.8m input tax credits and \$31.4m excise tax recoverable (Refer to Note 3 (vi)), with the remainder related to deposits at bank in support of environmental bonds and carbon tax credits.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

10 DERIVATIVES AND OTHER FINANCIAL ASSETS

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Current		
Other assets (1)	0.6	-
	<u>0.6</u>	<u>-</u>
Non-Current		
Financial assets at fair value through other comprehensive income (2)	55.4	72.6
Convertible debentures (3)	0.2	-
	<u>55.6</u>	<u>72.6</u>
	<u><u>56.2</u></u>	<u><u>72.6</u></u>

1. Represents the unamortised portion of upfront fees and other costs incurred in amending US\$ banking facilities. These fees are being amortised to reflect an approximate pattern of consumption over the terms of the facilities.
2. Represents the fair value of investments in Gold Standard Ventures Corp. and NuLegacy Gold Corporation which are listed on the Toronto Stock Exchange and MOD Resources Ltd which is listed on the Australian Securities Exchange.
3. Represents convertible debentures issued by Locrian Resources Inc. at amortised cost.

11 INVENTORIES

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Current		
Gold in circuit	17.3	10.5
Ore - at cost	37.8	40.7
Gold on hand	5.4	7.1
Gold and copper concentrate	2.9	0.6
Maintenance stores	45.9	40.1
	<u>109.3</u>	<u>99.0</u>
Non-Current		
Ore - at cost	193.7	186.1
	<u>193.7</u>	<u>186.1</u>
Total inventories	<u><u>303.0</u></u>	<u><u>285.1</u></u>

During the year, ore inventories were written down by \$0.2 million (2017: \$0.5 million).

At January 1	120.9	89.3
Arising during the year/revised estimate	(17.8)	32.5
Accretion	2.9	2.9
Utilised	(0.2)	(4.3)
Transferred from/(to) current	(4.9)	0.6
Exchange adjustment	(4.6)	(0.1)
At December 31	96.3	120.9

Rehabilitation

A provision for rehabilitation is recorded in relation to the gold/copper mining operations for the rehabilitation of the disturbed mining area to a state acceptable to various regulatory authorities. While rehabilitation is ongoing, final rehabilitation of the disturbed mining area is not expected until the cessation of mining for Macraes, Didipio, Waihi and Haile.

Rehabilitation provisions are based on rehabilitation plans estimated on survey data, external contracted rates and the timing of the current mining schedule. Provisions are discounted using a risk free rate with the cash flows adjusted for risks.

Rehabilitation provisions are subject to an inherent amount of uncertainty in both timing and amount and as a result are continuously monitored and revised.

Asset retirement obligations are initially recorded as a liability at present value of estimated future costs, assuming risk free discount rates of between 1.09% and 3.58% (2017: 2.58% to 5.00%). The liability for retirement and remediation on an undiscounted basis is estimated to be approximately \$109.0 million (2017: \$149.2 million).

17 DERIVATIVES AND OTHER FINANCIAL LIABILITIES

	2018 \$m	2017 \$m
Current		
Gold put/call options (1)	2.3	0.9
Copper swap (2)	-	2.8
	2.3	3.7

- At December 31, 2018, this represents three series of bought gold put options with average price of NZ\$1,813 per ounce and three series of sold gold call options with average price of NZ\$2,000 per ounce. At December 31, 2018, 169,200 ounces of gold options remained outstanding. These gold options are undesignated for hedging accounting purposes and accounted at fair value through the Statement of Comprehensive Income. These gold options cover future gold production from New Zealand mines.

At December 31, 2017, this represented two series of bought gold put options with average price of NZ\$1,750 per ounce and two series of sold gold call options with average price of NZ\$1,938 per ounce. At December 31, 2017, 144,000 ounces of gold options remained outstanding.

Put options Strike price NZ\$	Call options Strike price NZ\$	Ounces of gold outstanding at December 31, 2018	Ounces of gold outstanding at December 31, 2017	Expiring

1,810	2,000	56,400	-	December 2019
1,811	2,000	56,400	-	December 2019
1,819	2,000	56,400	-	December 2019

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

17 DERIVATIVES AND OTHER FINANCIAL LIABILITIES (CONTINUED)

2. This represented the fair value of copper swap agreement that were entered into by the Group in 2017 to sell copper at a fixed price of \$7,040 per metric tonne for the period of January 2018 to December 2018. At December 31, 2018, no metric tonnes of copper swap remained outstanding. This copper swap was undesignated for hedge accounting purposes and accounted at fair value through the Statement of Comprehensive Income.

Swap Price	Metric tonnes of copper outstanding at December 31, 2018	Metric tonnes of copper outstanding at December 31, 2017	Expired December 2018
\$7,040	-	12,000	

18 INTEREST-BEARING LOANS AND BORROWINGS

	December 31 2018 \$m	December 31 2017 \$m
Current		
Capital leases (1)	9.9	13.9
US\$ banking facilities (2)	-	50.0
	<u>9.9</u>	<u>63.9</u>
Non-Current		
Capital leases (1)	16.6	26.5
US\$ banking facilities (2)	150.0	150.0
	<u>166.6</u>	<u>176.5</u>

1 Capital Leases

The Group has capital lease facilities in place with Caterpillar Finance. These facilities have maturities between January 2019 to June 2021.

2 US\$ banking facilities

On June 29, 2018, the Group amended its loan facility with the Group's banking syndicate and decreased its overall credit facilities to \$220.0 million. The facilities are with a multi-national group of banks and mature on December 31, 2020. The facilities stepped down from \$220.0 million to \$200.0 million as at December 31, 2018 and will step down to \$150.0 million as at December 31, 2019. At December 31, 2018, those facilities stood at \$200.0 million with \$150.0 million drawn and \$50.0 million undrawn.

Assets Pledged

As security for the Group's banking facilities, the Group's banking syndicate have been granted real property mortgages over titles relevant to the New Zealand and US mines. They also have the ability to enter into real property and chattel mortgages in respect of the Didipio mine, and be assigned the Financial or Technical Assistance Agreement, subject to the requirements of applicable laws. Furthermore, certain subsidiaries of the Group have granted security in favour of the banking syndicate over their assets which include shares that they own in various other subsidiaries of the Group.

19 SHARE CAPITAL

Movement in common shares on issue

	December 31 2018 Million shares	December 31 2018 \$m	December 31 2017 Million shares	December 31 2017 \$m
Balance at the beginning of the year	615.9	1,093.8	611.0	1,083.4
Options exercised	2.7	5.2	4.9	10.4
Balance at the end of the period	<u>618.6</u>	<u>1,099.0</u>	<u>615.9</u>	<u>1,093.8</u>

Common shares holders have the right to receive dividends as declared and, in the event of the winding up of the Company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held. Common shares entitle their holder to one vote, either in person or by proxy, at a meeting of the Company.

Common shares have no par value and are all fully paid. The Company has not established a maximum number for authorised shares.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2018
--

19 SHARE CAPITAL (CONTINUED)

Each CHESS Depository Interests ("CDIs") represents a beneficial interest in a common share in the Company. CDI holders have the same rights as holders of common shares except that they must confirm their voting intentions by proxy before the meeting of the Company.

A potential non-controlling interest is referred to in Note 3(vii) and Note 32(a).

The Company has share option and rights schemes under which options and rights to subscribe for the Company's shares have been granted to executives and management.

20 CONTRIBUTED SURPLUS MOVEMENT

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Balance at the beginning of the year	45.3	43.3
Share based compensation expense	7.1	6.5
Forfeited options	(0.2)	(0.9)
Exercised options	(2.0)	(3.6)
Balance at the end of year	<u>50.2</u>	<u>45.3</u>

Contributed surplus

Employee stock based compensation	20.2	15.3
Shareholder options (lapsed on January 1, 2009)	18.0	18.0
Equity portion of convertible notes	12.0	12.0
	<u>50.2</u>	<u>45.3</u>

21 OTHER RESERVES

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Foreign currency translation reserve (1)	9.6	28.3
Fair value reserve (2)	25.1	43.2
Total other reserves	<u>34.7</u>	<u>71.5</u>

1. *Foreign currency translation reserve*
The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.
2. *Fair value reserve*
The fair value reserve is used to record fair value differences on equity instruments (Note 10). When an investment is derecognised prior to January 1, 2018 under the then prevailing IAS39 - Financial Instruments: Recognition and Measurement, the cumulative gain or loss in equity is reclassified to the Statement of Comprehensive Income. \$5.3 million was reclassified to the Statement of Comprehensive Income upon sale of shares in Gold Standard Ventures Corp in 2017.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

22 SEGMENT INFORMATION

The Group's operations are managed on a regional basis. The three reportable segments are New Zealand, the Philippines and the United States. The business segments presented below reflect the management structure of the Group and the way in which the Group's management reviews business performance. The Group sells its gold bullion to a mint in Australia and a refiner in the United States, and sells its gold-copper concentrate to a commodity trader in Singapore. Gold bullion is produced in New Zealand, the Philippines and the United States and gold-copper concentrate is produced in the Philippines.

The Group also made sales of \$76.9 million in the United States segment during the nine months ended September 30, 2017. The revenue is accounted for as pre-production income and recognised as credit against Mining Assets in Development (Note 13).

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

23 STOCK-BASED COMPENSATION

The total share based payment expense for 2018 was \$6.9 million (2017: \$5.6 million).

(a) Executive share options plan

Directors, executives and certain senior members of staff of the Group hold options over the common shares of the Company, OceanaGold Corporation. Each option entitles the holder to one common share upon exercise. The options were issued for nil consideration and have a maximum term of eight years. Granted options vest in three equal tranches over three years and vesting is subject only to continuity of employment.

The options cannot be transferred without the Company's prior approval and the Company does not intend to list the options. No options provide dividend or voting rights to the holders. Under the 2007 stock based compensation plan approved by OceanaGold shareholders the Company can issue up to 10% of issued common and outstanding shares.

(i) Stock option movements

The following table reconciles the outstanding share options granted under the executive share option scheme at the beginning and end of the year:

WAEP = weighted average exercise price

	<i>December 31, 2018</i>		<i>December 31, 2017</i>	
	No.	WAEP	No.	WAEP
Outstanding at the start of the year	840,166	A\$2.35	1,879,366	A\$2.79
Exercised	(605,374)	A\$2.29	(993,696)	A\$3.18
Expired	(49,063)	A\$2.47	(45,504)	A\$2.43
Balance at the end of the year	185,729	A\$2.49	840,166	A\$2.35
Exercisable at the end of the year	185,729	A\$2.49	840,166	A\$2.35

Options granted were priced using a binomial option pricing model. Where options had a single exercise date the Black Scholes valuation model was used. Where options do not have a performance hurdle they were valued as American style options using the Cox Rubenstein Binomial model.

The expected life used in the model has been based on the assumption that employees remain with the Company for the duration of the exercise period and exercise the options when financially optimal. This is not necessarily indicative of exercise patterns that may occur.

Historical volatility has been used for the purposes of the valuation. Expected volatility is based on the historical share price volatility using three years of traded share price data. As a result it reflects the assumption that the historical volatility is indicative of future trends, which may not necessarily be the outcome.

Dividend yield was assumed to be nil on the basis that no dividends had been declared prior to the grant date.

(ii) Balance at the end of the period

The share options outstanding at December 31, 2018 had an exercise price of between A\$2.40 and A\$2.68 and a weighted average remaining life of 0.38 year.

At December 31, 2018, \$nil (2017: \$nil) remains to be expensed over the life of the options.

(b) Performance share rights plan

The Managing Director and certain employees of the Group, as designated by the Board of Directors, have been granted rights to common shares of the Company, OceanaGold Corporation. Each right entitles the holder to one common share upon exercise. The rights were issued for nil consideration and are subject to market-based performance conditions (based on various Total Shareholder Return (TSR) hurdles) and continuity of employment. The rights cannot be transferred without the Company's prior approval and right holders are not entitled to dividends of unvested rights.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

23 STOCK-BASED COMPENSATION (CONTINUED)

(b) Performance share rights plan (continued)

(i) Performance share rights plan movements

The following table reconciles the outstanding rights granted under the performance share rights plan at the beginning and the end of the year:

WAEP = weighted average exercise price

	<i>December 31, 2018</i>		<i>December 31, 2017</i>	
	No.	WAEP	No.	WAEP
Outstanding at the start of the year	9,622,537	A\$0.00	8,834,593	A\$0.00
Granted	5,404,751	A\$0.00	3,195,584	A\$0.00
Forfeited	(1,038,731)	A\$0.00	(850,278)	A\$0.00
Exercised	(1,066,546)	A\$0.00	(1,557,362)	A\$0.00
Balance at the end of the year	12,922,011	A\$0.00	9,622,537	A\$0.00
Exercisable at the end of the year	-	-	-	-

Rights granted were priced using Monte Carlo simulation (using the Black-Scholes framework) to model the Company's future price and TSR performance against the comparator group at vesting date. Monte Carlo simulation is a procedure for randomly sampling changes in market variables in order to value derivatives. This simulation models the TSR of the comparator group jointly by taking into account the historical correlation of the returns of securities in the comparator group.

The expected life used in the model has been based on the assumption that right holders will act in a manner that is financially optimal and will remain with the Company for the duration of the rights' life.

Historical volatility has been used for the purposes of the valuation. Expected volatility is a measure of the amount by which a price is expected to fluctuate during a period and is measured as the annualised standard deviation of the continuously compounded rates of return on the share over a period of time. The expected volatility of the Company and each company in the comparator group has been calculated using three years of historical price data. As a result it reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the outcome.

Dividend yield had been assumed to be 1.07% for grants in 2017 and 0.80% in 2018.

The following table gives the assumptions made in determining the fair value of the performance share rights granted in the financial year:

Grant Date	Dividend Yield	Expected Volatility	Risk-Free Interest Rate	Expected Life of Option (years)	Option Exercise Price	Share Price at Grant Date	Weighted Average Fair Value
31/05/2018	0.80%	49.80%	2.05%	3	0.00	A\$3.27	A\$1.83

(ii) Balance at the end of the period

The performance share rights outstanding at December 31, 2018 had an exercise price of A\$0.00 and a weighted average remaining life of 1.28 years.

(c) Replacement Stock Option plan

A Replacement Stock Option plan was introduced into the Group following the acquisition of Romarco Minerals Inc. Under the Plan of Arrangement, each outstanding Romarco option was exchanged for a Replacement Option from OceanaGold. The number of OceanaGold shares equal to 0.241 multiplied by the number of Romarco shares subject to such Romarco option.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

23 STOCK-BASED COMPENSATION (CONTINUED)

(c) Replacement Stock Option plan (continued)

(i) Replacement Stock Option plan movements

The following table reconciles the outstanding rights granted under the Replacement Stock Option plan at the beginning and the end of the year:

WAEP = weighted average exercise price

	<i>December 31, 2018</i>		<i>December 31, 2017</i>	
	No.	WAEP	No.	WAEP
Outstanding at the start of the year	1,357,983	C\$2.73	3,696,581	C\$2.59
Exercised	(1,018,490)	C\$2.77	(2,338,598)	C\$2.51
Expired	(57,502)	C\$2.92	-	C\$0.00
Balance at the end of the year	281,991	C\$2.54	1,357,983	C\$2.73
Exercisable at the end of the year	281,991	C\$2.54	1,357,983	C\$2.73

Options granted were valued using the Black-Scholes option pricing model. For employees, the Company recognises stock-based compensation expense based on the estimated fair value of the options on the date of the grant. The fair value of the options is recognised over the vesting period of the options granted as stock-based compensation expense and corresponding adjustment to contributed surplus. The number of options expected to vest is periodically reviewed and the estimated option forfeiture rate is adjusted as required throughout the life of the option. Upon exercise these amounts are transferred to share capital.

Historical volatility has been used for the purposes of the valuation. Expected volatility is a measure of the amount by which a price is expected to fluctuate during a period and is measured as the annualised standard deviation of the continuously compounded rates of return on the share over a period of time. The expected volatility of the Company has been calculated using historical price data based on the estimated life of the options. As a result it reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the outcome.

Dividend yield had been assumed to be nil on the basis that no dividends had been declared previously.

The risk-free rate for the expected term of the option was based on the Government of Canada yield curve in effect at the time of the grant.

(ii) Balance at the end of the period

The share options outstanding at December 31, 2018 had an exercise price of between C\$2.06 and C\$3.24 and a weighted average remaining life of 1.02 years.

At December 31, 2018, \$nil (2017:\$nil) remains to be expensed over the life of the options.

(d) Deferred Unit Plan ("DUP")

The Company introduced and adopted the cash based Deferred Unit Plan for Non-Executive Directors. The DUP provides that participants are issued notional units that are economically equivalent to owning Common Shares of the Company. Each Deferred Unit has an initial value equal to the value of a Common Share at the time of grant. No equity in the Company is issued pursuant to the cash based DUP.

The Board grants Deferred Units in the value of US\$50,000 on an annual basis to each of the Non-Executive Directors.

Whenever cash dividends are paid on the Common Shares, additional Deferred Units are credited to the holders of Deferred Units, calculated by dividing the total cash dividends that would have been paid by the market value on the trading day immediately after the record date for the dividend.

The units will automatically vest and are redeemable into cash upon the earlier of (a) the three years anniversary of the grant; and (b) the termination date of the Non-Executive Directors.

The aggregate number of Deferred Units that may be granted to the Non-Executive Directors and remain outstanding under the DUP shall not at any time, when taken together with Common Shares reserved for issuance pursuant to all of the Company's security based compensation arrangements then either in effect or proposed, result in the aggregate number of Deferred Units and Common Shares issuable or reserved for issuance to Non-Executive Directors at any time exceeding 1% of the issued and outstanding Common Shares of the Company.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

23 STOCK-BASED COMPENSATION (CONTINUED)

(d) Deferred Unit Plan (continued)

(i) Deferred unit movements

The following table reconciles the outstanding deferred units granted under the deferred unit plan at the beginning and at the end of the year:

	<i>December 31, 2018</i>	<i>December 31, 2017</i>
	No.	No.
Outstanding at the start of the year	332,735	231,071
Granted	192,353	101,664
Exercised	(266,387)	-
Balance at the end of the year	258,701	332,735
Exercisable at the end of the year	-	-

The fair value of the units granted under the Deferred Unit Plan is calculated as the future cash flow and it is re-measured at each reporting date and at the date of settlement. Any changes in fair value are recognised in the Statement of Comprehensive Income for the period with a corresponding increase or decrease in liability. The liability is expensed over the relevant vesting period. At December 31, 2018, the fair value of the units was \$0.9 million (2017: \$0.9 million) and \$0.5 million (2017: \$0.5 million) was expensed.

(c) Defined contribution plans

The Group has defined contribution pension plans for certain groups of employees. The Group's share of contributions to these plans is recognised in the statement of comprehensive income in the year it is earned by the employee.

25 FINANCIAL INSTRUMENTS

Financial Risk Management

The Group has exposure to the following risks arising from financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the Group's exposure to each of the above risks and the Group's objectives, policies and processes for measuring and managing risk.

Financial Risk Management Objectives and Policies

The Board has the overall responsibility for the establishment and oversight of the Group's financial risk management framework. A Financial Risk Management Policy has been established, which has been approved by and is subject to annual review by the Board. This policy establishes a framework for managing financial risks.

In line with this policy, the Group does not enter into financial instruments, including derivative financial instruments for trade or speculative purposes. The term "derivative" has been adopted to encompass all financial instruments that are not directly traded in the primary physical market.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's cash and cash equivalents, trade and other receivables and hedging instruments (specifically the gold call/put options and copper swaps that were in place during the year).

The Board approves all hedging transactions and has established a Financial Risk Management Policy which includes a hedging policy that limits the level and tenor of hedging activity.

Maximum credit risk of cash and cash equivalents, trade and other receivables, convertible debentures, gold call/put options and copper swaps are the carrying amounts recorded in the statement of financial position.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

25 FINANCIAL INSTRUMENTS (CONTINUED)

Credit risk (continued)

The Group is not materially exposed to any individual counterparty because it has limited its exposure by spreading contracts for these instruments across several different counterparties.

At December 31, 2018, the Group's cash was mainly held with one major bank (credit rating AA-) with the largest exposure being 94% (2017: 79%). At December 31, 2018, the Group's gold call/put options were with three financial institutions with credit ratings of A+ and AA-.

No financial assets were deemed overdue or impaired.

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Group's approach to managing liquidity is to ensure cost effective continuity in funding and trading liquidity. Funding liquidity is maintained through the use of the US\$ revolving credit facilities, capital leases, operating leases and trade financing. Trading liquidity is maintained by an effective spread between the counterparties with which the Group enters into derivative transactions.

The Group's funding liquidity risk policy is to source debt or equity funding appropriate to the use of funds. Examples include equipment leases to finance the mining fleet and the US\$ revolving credit facilities to finance the development of new mines and provide for general working capital needs.

The Group's trading risk policy is to ensure derivative transactions, if any, are spread between at least two counterparties acknowledging both volume and tenor of the derivative to reduce the risk of trading illiquidity arising as a result of the inability to close down existing derivative positions, or hedge underlying risks incurred in normal operations.

The following are the contractual maturities of financial liabilities, including the estimated interest payments.

Year ended December 31, 2018	<i>Carrying amount \$m</i>	<i>Contractual cash flows \$m</i>	<i>12 months or less \$m</i>	<i>1-3 years \$m</i>	<i>3+ years \$m</i>

25 FINANCIAL INSTRUMENTS (CONTINUED)

Liquidity risk (continued)

At December 31, 2018, current assets were \$252.3 million and current liabilities were \$182.8 million, resulting in a net current asset of \$69.5 million.

Market risk

Market risk is the risk that changes in market prices, such as commodity prices, foreign exchange rates and interest rates will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Commodity price risk and foreign exchange risk

Prices for the Group's commodity products (gold bullion and copper) are determined on international markets and quoted in US dollars. All hedging programs are managed in accordance with policies approved by the Board. Performance under these policies is regularly reported to the Board. More details on the hedges in place are found in Note 10 and Note 17.

The Group has entered into series of bought gold put options and series of sold gold call options to lower commodity price risk exposure at its New Zealand Operations. As at December 31, 2018 there were 169,200 ounces of gold options remaining for the period January 2019 to December 2019 with an average put price of NZ\$1,813 per ounce and call price of NZ\$2,000 per ounce.

In respect of managing copper price risk exposure due to typical long lead time in settling copper sales, the Group has the option to fix the price of copper with the buyer on part of the shipment once the latter reaches the smelter.

Foreign exchange risk is managed by holding cash and cash equivalents in different currencies in line with the anticipated requirements of the business and achieving a diversified holding mainly through selling gold in the currencies needed.

Sensitivity analysis

At December 31, 2018 if the US dollar had depreciated / appreciated by 10% with all other variables remaining constant, the effect on the profit before tax would be \$6.1 million higher/lower (2017: \$2.9 million profit higher/lower) due to exchange gains/ losses on cash and cash equivalents. The impact on other equity will be \$nil (2017: \$nil).

Interest rate risk

The Group's approach to managing the risk of adverse changes in interest rates is to manage the identified net exposure through variable and fixed rate arrangements.

The Group's policy is to manage interest rate risk in a cost efficient manner having regard to the net interest rate exposure after offsetting interest bearing financial assets with interest accruing financial liabilities.

At the reporting date, the interest rate profile of the Group's interest bearing financial instruments was as follows:

Sensitivity analysis

At December 31, 2018 if interest rates had increased/decreased by 100 basis points from the year end rates with all other variables held constant, the profit before tax for the year would have been \$1.2 million lower/higher (2017: \$2.3 million profit lower/higher), as a result of higher/lower interest income from average cash and cash equivalents held and higher/lower interest expense from average the US\$ banking facilities drawn. The impact on other equity is nil for both 2018 and 2017.

The Group's exposure to interest rate risk classes of financial assets and financial liabilities, both recognised and unrecognised at the reporting date, is set out below:

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

25 FINANCIAL INSTRUMENTS (CONTINUED)

Market risk (continued)

	<i>Carrying amount</i>	
	<i>2018</i>	<i>2017</i>
	<i>\$m</i>	<i>\$m</i>

<i>Financial liabilities</i>		
Capital leases	26.5	36.0
US\$ banking facilities	150.0	200.0
	<u>176.5</u>	<u>236.0</u>

Fair value sensitivity analysis for fixed rate instruments

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore a change in interest rates at the reporting date would not affect profit or loss.

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates and 10% change in the US dollar against other foreign currency exchange rates would have increased/(decreased) equity and profit or loss before tax by the amounts shown below. This analysis assumes that all other variables remain constant.

December 31, 2018	Interest rate risk					Foreign exchange risk			
	-100 bps			+100 bps		-10%		+10%	
	Carrying amount	Profit/ (Loss)	Other equity	Profit/ (Loss)	Other equity	Profit/ (Loss)	Other equity	Profit/ (Loss)	Other equity

26 CAPITAL DISCLOSURE

The Group's objective when managing capital is to:

- manage the entity's ability to continue as a going concern; and
- in the medium to long term, provide adequate return to shareholders.

The Group manages capital in the light of changing economic circumstances and the underlying risk characteristics of the Group's assets. In order to meet its objective, the Group manages its dividend declarations and may undertake capital restructuring including: sale of assets to reduce debt; additional funding facilities and equity raising.

The Group monitors capital on the basis of debt-to-equity ratio. The components and calculation of this ratio is shown below.

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Total debt (as shown in the statement of financial position)*	176.5	240.4
Less: cash and cash equivalents	(107.7)	(73.2)
Net debt	<u>68.8</u>	<u>167.2</u>
 Total equity (as shown in the statement of financial position)	 <u>1,566.7</u>	 <u>1,490.9</u>
Net debt to equity ratio	1:23	1:9

* Interest-bearing liabilities

The Group is subject to a number of externally imposed capital requirements relating to financing agreements. As at December 31, 2018 and 2017, the Group was in compliance with all requirements.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

27 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method.

The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2). Valuations are obtained from issuing institutions.
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

December 31, 2018	Level 1	Level 2	Level 3	Total
	\$m	\$m	\$m	\$m
<i>Recurring measurements</i>				
Derivatives embedded in accounts receivable	-	(0.6)	-	(0.6)
Equity instruments	55.4	-	-	55.4
Total assets	55.4	(0.6)	-	54.8
Gold put/call options	-	2.3	-	2.3
Copper swaps	-	-	-	-
Total liabilities	-	2.3	-	2.3
December 31, 2017	Level 1	Level 2	Level 3	Total
	\$m	\$m	\$m	\$m
<i>Recurring measurements</i>				
Derivatives embedded in accounts receivable	-	0.1	-	0.1
Equity instruments	72.6	-	-	72.6
Total assets	72.6	0.1	-	72.7
Gold put/call options	-	0.9	-	0.9
Copper swaps	-	2.8	-	2.8
Total liabilities	-	3.7	-	3.7

The fair values of financial assets and liabilities are the same as their carrying amounts.

28 COMMITMENTS

(a) Lease commitments under non-cancellable operating leases:

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Within 1 year	4.6	3.4
Within 1 to 2 years	3.0	3.0
Within 2 to 3 years	0.8	2.1
Within 3 to 4 years	0.6	0.3
Within 4 to 5 years	0.1	0.4
More than five years	-	0.3
	<u>9.1</u>	<u>9.5</u>

Operating leases are used to obtain various items of plant and equipment. No leases have escalation clauses other than in the event of payment default. No lease arrangements create restrictions on other financing transactions.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

28 COMMITMENTS (CONTINUED)

(b) Lease commitments under capital leases:

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Within 1 year	10.9	15.4
Within 1 to 2 years	16.1	10.9
Within 2 to 3 years	0.9	16.1
Within 3 to 4 years	-	0.9
	<u>27.9</u>	<u>43.3</u>
Future finance charges	(1.4)	(2.9)
Present value of minimum lease payments	<u>26.5</u>	<u>40.4</u>
<i>Reconciled to:</i>		
Current interest-bearing liability (Note 18)	9.9	13.9
Non-Current interest-bearing liability (Note 18)	16.6	26.5
Total	<u>26.5</u>	<u>40.4</u>

Capital leases are used to fund the acquisition of plant and equipment, primarily mobile mining equipment. Rental payments are subject to monthly or quarterly interest rate adjustment.

(c) Gold production

The Group had certain obligations to pay royalties on gold production at prescribed levels in 2018 which are expected to continue in 2019. These royalties represent 1% to 2% of gold sales and were \$10.7 million in 2018 (2017: \$13.2 million).

(d) Capital commitments

At December 31, 2018, the Group has commitments of \$17.4 million (2017: \$7.7 million), principally relating to the purchase of property, plant and equipment mainly in Didipio and New Zealand, and the development of mining assets in Didipio.

The commitments contracted for at reporting date, but not provided for:

	<i>December 31 2018 \$m</i>	<i>December 31 2017 \$m</i>
Within one year:		
- purchase of property, plant and equipment	11.2	3.6
- development of mining assets	6.2	4.1
	<u>17.4</u>	<u>7.7</u>

The Group is committed to annual expenditure of approximately \$0.2 million (2017: \$0.3 million) to comply with regulatory conditions attached to its New Zealand prospecting, exploration and mining permits.

The above capital commitments exclude contracted commitments which the Group is able to exit without significant fees.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2018**

28 COMMITMENTS (CONTINUED)

(e) Didipio Financial or Technical Assistance Agreement

The Didipio Project is held under a Financial or Technical Assistance Agreement ("FTAA") granted by the Philippines Government in 1994. The FTAA has an initial term of 25 years and is renewable for another period of 25 years under the same terms and conditions in June 2019. The company has commenced the renewal process and lodged an application for the renewal of the FTAA with the Department of Environment and Natural Resources ("DENR") which has been accepted. The regional office of the Mines and Geosciences Bureau (MGB) that was tasked with reviewing the renewal application has endorsed it to the Central Office. The company will continue to work with the Government of the Philippines and the stakeholders and partners to complete the renewal process. The FTAA grants title, exploration and mining rights with a fixed fiscal regime. Under the terms of the FTAA, after a period in which the Group can recover development expenditure, capped at 5 years from the start of production (April 1, 2013) and a further 3 years over which any remaining balance is amortised, the Company is required to pay the Government of the Republic of the Philippines 60% of the "Net Revenue" earned from the Didipio Project. For the purposes of the FTAA, "Net Revenue" is generally the net revenues derived from mining operations, less deductions for, amongst other things, expenses relating to mining, processing, marketing, depreciation and certain specified overheads. In addition, all taxes paid to the Government and certain specified amounts paid to land claim owners are included as part of the calculation of 60% payable.

29 RELATED PARTIES

There are no related party transactions other than those with key management personnel as noted below.

(a) Compensation of key management

Key management includes Directors (executive and non-executive) and some members of the Executive Committee. The compensation paid or payable to key management for employee services is shown below:

	Year ended	
	December 31 2018	December 31 2017
	\$m	\$m
Salaries and short-term employee benefits	4.8	5.4
Post-employment benefits	0.2	0.2
Termination benefits	-	0.2
Share-based payments	5.4	4.7
Total	10.4	10.5

(b) Loans to key management personnel

There are no loans to key management personnel during the year (December 2017: Nil).

(c) Other transactions with key management personnel

There are no other transactions with key management personnel during the year (December 2017: Nil).

30 NON-CASH INVESTING AND FINANCING ACTIVITIES

	Year ended	
	December 31 2018	December 31 2017
	\$m	\$m

Romarco Minerals Inc.	Canada	100.0	100.0

32 CONTINGENCIES

(a) A wholly owned subsidiary of the Company is party to an addendum agreement with a syndicate of original claim owners, led by Mr. J. Gonzales, in respect of a portion of the FTAA area ("Addendum Agreement"). Certain disputed claims for payment and other obligations under the Addendum Agreement made by Gonzales are subject to arbitration proceedings, which are presently suspended due to the irrevocable resignation of the arbitrator. Mr. Gonzales passed away in late 2014. Further, a third party is also disputing Mr. Gonzales' interest in the Didipio Project. The Company is awaiting on the outcome of any determination or settlement negotiation between Mr. Gonzales and the third party disputor.

(b) The Department of Environment and Natural Resources of the Philippines ("DENR"), along with a number of mining companies (including OceanaGold (Philippines) Inc.), are parties to a case that was filed in 2008 whereby a group of Non-Governmental Organisations (NGOs) and individuals challenged the constitutionality of the Philippines Mining Act ("Mining Act"), the Financial or Technical Assistance Agreements ("FTAAs") and the Mineral Production Sharing Agreements ("MPSAs") in the Philippines Supreme Court. After some years of slow development, the case proceeded to oral hearing in 2013 and is currently awaiting decision from the Supreme Court.

Notwithstanding the fact that the Supreme Court has previously upheld the constitutionality of both the Mining Act and the FTAAs, the Company is mindful that litigation is an inherently uncertain process and the outcome of the case may adversely affect the operation and financial position of the Company. At this stage, it is not possible to identify the potential orders of the Court nor to quantify the possible impact. The Company is working closely with the DENR, the other respondents in the case, and the mining industry to defend the Mining Act and the validity of its FTAA.

(c) On February 14, 2017, the Company received an order from the DENR calling for the suspension of the Didipio operation, citing "... petition of the Local Government of Nueva Vizcaya for the cancellation of the FTAA; alleged damages to houses caused by the blasting operation; and the potential adverse impact to the agricultural areas of the Province..." as reasons for the decision. The Company maintains that there is no legal basis for the proposed suspension, and the Didipio operation is not in violation of any laws, rules or regulations. Subsequent to receiving the suspension order, the Company filed an appeal with the Office of the President ("OP"), which has the effect of immediately staying the execution of the DENR suspension order. On March 15, 2017, the Company filed the Appeal Memorandum with the OP substantiating its grounds for appeal. The DENR filed its commentary to the Company's Memorandum on or around May 8, 2017, and the Company subsequently filed a further reply to the DENR commentary. The matter is currently awaiting a decision from the OP. The Didipio operation has continued to operate during the appeal process.

(d) The Company operates in a number of jurisdictions. In the normal course of operations, the Company is occasionally subject to claims or litigations, including claims relating to workers compensation, motor vehicle accidents and items of similar nature. The Company deals with these claims as and when they arise. The Group also maintains specific insurance policies to transfer the risk of such claims. No provision is included in the accounts unless the Directors believe that a liability has been crystallised. In those circumstances where such claims are of material effect, have merit and are not covered by insurance, their financial effect is provided for within the financial statements. Other than as disclosed in these financial statements and other public filings, there are no claims that the Company believes will result in material losses as at the date of these financial statements.

(e) The Group has provided guarantees in respect of the \$200.0 million banking facilities (Note 18). At December 31, 2018 the total outstanding balance under these facilities is \$150.0 million (December 31, 2017: \$200.0 million). Associated with this guarantee are certain financial compliance undertakings by the Group, including gearing covenants which the Group complied with at December 31, 2018.

32 CONTINGENCIES (CONTINUED)

- (f) The Group has provided guarantees in respect of the capital lease agreements for certain mobile mining equipment entered into by the controlled entities. At December 31, 2018 the outstanding rental obligations under the capital lease are \$27.9 million (December 31, 2017: \$43.3 million). Associated with this guarantee are certain financial compliance undertakings by the Group, including gearing covenants which the Group complied with at December 31, 2018.
- (g) The Group has issued bonds in favour of various New Zealand authorities (Ministry of Economic Development - Crown Minerals, Otago Regional Council, Waitaki District Council, West Coast Regional Council, Buller District Council, Timberlands West Coast Limited and Department of Conservation) as a condition for the grant of mining and exploration privileges, water rights and/or resource consents, and rights of access for the Macraes Gold Mine and the Globe Progress Mine at the Reefion Gold Project which amount to approximately \$34.8 million (December 31, 2017: \$36.7 million).
- (h) The Group has provided a cash operating bond to the New Zealand Department of Conservation of \$0.4 million (December 31, 2017: \$0.4 million) which is refundable at the end of the Globe Progress mine. This amount is included in the total referred to in (g) above.
- (i) The Group has contingent liabilities under contracts, guarantees and other agreements arising in the ordinary course of business on which no loss is anticipated. Bonds have been issued in favour of various New Zealand authorities (Ministry of Energy, Hauraki District Council, Waikato Regional Council, Environment Waikato, Department of Conservation) as a condition for the grant of mining and exploration privileges, water rights and/or resource consents, and rights of access for Martha mining that amount to approximately \$36.6 million (December 31, 2017: \$39.2 million).
- (j) The mine operating permit at Haile which became final and effective during the first quarter of 2015 includes a schedule for estimated financial assurance of \$65.0 million over the mine life consisting of \$55.0 million in surety bonds or other mechanisms and \$10.0 million in an interest bearing cash trust. The Company has satisfied its current financial assurance payment requirements by using a surety bond of \$37.5 million. In addition, the Company has paid \$1.8 million in trust funding by the end of December 2018.

The remaining estimated financial assurance of \$25.7 million will be paid over the life of the mine with the next financial assurance payment anticipated to occur in 2019. The timing and amounts of these payments could change due to a number of factors including changes in regulatory requirements, changes in scope and timing of closure activities. The State requires financial assurance for the estimated costs of mine reclamation and closure, including groundwater quality protection programs.

The surety bond and other financial assurance must be maintained in force continuously throughout the life of the mining operation and may only be released, partially or in full, after the State of South Carolina approves its release.

33 EVENTS OCCURRING AFTER THE REPORTING PERIOD

Subsequent to the year end, the Company's Board of Directors declared an ordinary semi-annual dividend of US\$0.01 per common share (approximately US\$6.2 million), payable to the shareholders of record on March 7, 2019 and the dividend will be paid on April 26, 2019.

Other than the matter noted above, there have been no subsequent events that have arisen since the end of the financial year to the date of this report.
